

Relative Importance of Leadership Behaviors for Overall Effectiveness: A Study of the Energy Industry

Behaviors are listed in order of importance and magnitude. Total variance in overall effectiveness explained by all LEA 360™ behaviors is 64%.

The Behaviors that Drive Effectiveness

Effective energy industry leaders:

- **Think before acting** and **analyze the impact of their decisions** on the future of the organization (*Strategic*)
- **Express ideas and expectations clearly**, and keep others informed (*Communication*)
- **Are less likely to be autonomous** in the way they think and act (*Self*)
- **Demonstrate an active concern for others** and form supportive relationships (*Empathy*)
- **Value others' opinions and insights**, and actively seek input from others (*Consensual*)
- Are energetic and dynamic, and **use their enthusiasm to get others involved** (*Excitement*)
- **Identify with their field of expertise** and maintain in-depth, specialized knowledge in their areas (*Technical*)
- Maintain a calm and reserved demeanor, and **are restrained in their emotional expression** (*Restraint*)
- **Are comfortable being in charge**, and seek out opportunities to be influential and accomplish results through others (*Management Focus*)

The Study

- Observer data for 497 participants
- Collected 2014-2018
- 10+ countries
- Management level: all
- Job function: all
- Gender: 53% male, 25% female (22% not reported)

Analyses

A leadership effectiveness score incorporating all 30 LEA 360™ competencies was calculated for each participant. This score was regressed on the 22 LEA behaviors. A relative weights analysis was then conducted to determine which leadership behaviors were most closely associated with high effectiveness ratings in the energy industry.

Summary of Findings

Our current research on leadership effectiveness within the energy industry suggests relative importance toward the relational side of leadership versus achieving results. While much of our industry related research tends to skew in this direction, within the energy industry this tendency appears even stronger. This emphasis is centered on an ability to generate excitement, while at the same time displaying a level of professionalism. The full set of results suggests that successful energy industry leaders exhibit the following behaviors:

- ✓ They have a **great deal of industry knowledge and expertise** and they utilize this to think long term, evaluate issues, and **consider the broad implications of their decisions**.
- ✓ They put a high priority on **clearly defining their expectations**, keeping others **informed**, and articulating their ideas and views.
- ✓ They display a **genuine interest in the well-being of others** and understand they don't have all the answers, ensuring they **seek out the ideas and opinions of others** in the decision-making process.
- ✓ Through high levels of energy and enthusiasm, they are able to **make others feel good about themselves and their work**, while at the same time making a concerted effort to **remain calm under pressure** and ensure their emotional expression does not reduce their credibility.

Using the LEA 360™ to Develop Energy Industry Leaders

In order to develop leaders to encourage increasing or decreasing emphasis on specific behaviors, it is critical to employ a scientifically designed 360 assessment tool to accurately measure these behaviors.

By embracing individual leadership styles and placing them within the context of the organizational environment, the LEA 360™ stimulates individual and team growth through insights that are accurate, encouraging, and actionable.

The LEA 360™ can be used to support development, including efforts to:

- Use the research to inform the identification of specific leadership practices needed to achieve your organization's strategic goals
- Understand the leadership behaviors currently in practice and the gaps with desired state
- Provide relevant, insightful feedback to leaders from a variety of observers
- Reveal blind spots in the leaders' perceptions of their approach to leadership
- Build action and accountability into the leadership development process
- Provide constructive coaching suggestions for key areas of leadership development
- Provide an opportunity for regular, just-in-time feedback

The Instrument: the LEA 360™

The Leadership Effectiveness Analysis 360™ (LEA 360™) is an assessment and development tool that measures 22 leadership behaviors and 30 competencies. It is a powerful instrument for developing a nuanced understanding of an individual's unique approach to leadership both from their own perspective and in the eyes of their colleagues (bosses, peers and direct reports).

*MRG assessments are administered exclusively by MRG or by MRG certified partners.
