The Leadership Effectiveness Analysis™ (LEA)

Growth as a leader requires exploration and intention.

Many assessments attempt to reduce your diverse, multi-faceted leaders into a restrictive set of dimensions and place them on a single, narrow path — stifling potential and limiting growth.

The Leadership Effectiveness Analysis™ suite of assessments offers an expansive, holistic, and unparalleled view of your current and emerging leaders and provides a clear roadmap for growth and increased success.

The LEA™ measures 22 leadership behaviors grouped into six core functions, creating a uniquely insightful profile that provides a nuanced and scientifically sophisticated development tool. By embracing individual leadership styles and placing them within the context of your organizational environment, the LEA™ stimulates individual and team growth through insights that are accurate, encouraging, and actionable.

With individual, multi-rater and organizational impact versions of the assessment, the LEA™ Suite will help you:

- Identify specific leadership practices needed to achieve your organization's strategic goals
- Understand the leadership behaviors currently in practice and the gaps with desired state
- Provide relevant, insightful feedback to leaders from a variety of observers
- Build action and accountability into the leadership development process
- Provide constructive coaching suggestions for key areas of leadership development
- Assess a candidate's potential for leadership positions

Used alongside other MRG resources, the full suite of LEA assessments functions as the cornerstone of leadership development programs, and provides you with the tools to overcome key challenges, from succession planning in key positions to influencing shifts in organizational culture.
